## PROJECTS

### PaddleScreens

Computer vision match analytics for platform tennis — running at 8 clubs with 900+ match videos.

- Trained and fine-tuned models for ball tracking, player pose, and court segmentation, with 3D flight solving for line calls.
- Industrial cameras activated by scanning a QR code on court; I wrote the recorder that runs on each camera to record, upload, and stream.
- Super easy UI to see match statistics, replays, and close line calls.

[Case study](#)

### Beleeg

League software for amateur sports, with lebrAI — an AI copilot that runs the league from a single sentence.

- 43 actions — rain-outs, division emails, score disputes, dues — each one tap to confirm.
- Its MCP server lets Claude and Meta Muse run leagues; among the first apps submitted to Muse.
- Web and mobile, shipped solo in four months.

[Case study](#)

### RecruitPlan

College lacrosse recruiting on real commitment data — used by Laxachusetts, one of the top girls' programs in the country.

- Built the placement model, trained on ~34,000 real commitments, that places athletes across 12 tiers from top D1 to NAIA.
- Daily data pipelines for 588 college programs and 62,000 roster players.

[Live](#)

### Tutorius Math

A full stack iOS app providing premium tutoring to underprivileged students — 10,000+ downloads in its first year.

- Winner of the [Best Mobile App Award](#), September 2023.
- Invented a Swift algorithm for inline LaTeX equations, answering an [unanswered Stack Overflow question](#).

## EXPERIENCE

### Principal Engineer Capital One

Apr 2025 – Present

- Account Opening iOS Engineering Team Lead.
- “Top Dog” winner for AI Championing and Collaboration — an award for influence across all engineering teams.

### Software Engineer, Full Stack Meta

Mar 2020 – Dec 2024

- Built and shipped Orion Glasses — the first AR glasses prototype on the market — using C++, Kotlin, and React Native.
- Integrated wearable devices (Ray-Ban Meta, smart glasses, smartwatch) with Meta's iOS family of apps for peer-to-peer video calling using React, Obj-C, and C++.
- Led the Instagram iOS smartwatch team.

### Senior iOS Developer / Project Manager EarthCam, Inc.

2019 – 2020

- Oversaw iOS development of four live-production apps in Swift and Obj-C.
- Decreased crash frequency from 4.8% to 0.7% of all users.

### Math Professor

University of Bridgeport · Bridgeport, CT

2011 – 2018

- Developed a new placement exam with an algorithm that cut initial math-class dropouts by 17%.
- Taught Differential Equations and Multivariable Calculus.

## SKILLS

### Technical

AI Agents   Claude   MCP  
Computer Vision   ML   Python  
TypeScript   React   Next.js  
React Native   Swift   SwiftUI   C++  
C   Kotlin   Obj-C   Node  
PostgreSQL   Supabase   Firebase  
AWS   GCP   Stripe

## EDUCATION

### Bachelors in Mathematics

Carnegie Mellon University · 2004 – 2008

### Masters in Math Education

Columbia University · 2009 – 2010

## OUTSIDE WORK

Platform tennis — peak APTA ranking of #14 in the country

Golf — 4.3 handicap index
