

MICHAEL MONTALBANO

Full Stack Developer

+1-914-589-4003 @ montabano1@gmail.com http://michaelmontalbano.com

New York, NY

EXPERIENCE

Principal Engineer

Capital One

04/2025 - Present Location

- Account Opening iOS Engineering Team Lead
- "Top Dog" winner for AI Championing and Collaboration - award for influence over all Engineering Teams

E5 Software Engineer - Full Stack

Meta

03/2020 - 12/2024 Remote

- Built and shipped Orion Glasses - the first AR Glasses prototype on the market - using C++, Kotlin and React Native.
- Integrated wearable devices (Ray-Ban Meta, Smart Glasses, Smart Watch) with Meta iOS Family of Apps for peer-to-peer video calling using React, Obj-C, and C++. Led Instagram iOS Smart Watch team.

Senior iOS Developer/ Project Manager

Earthcam, Inc.

2019 - 2020 Saddle River, NJ

- Oversaw iOS development of 4 live-production apps in Swift and Obj-C.
- Decreased crash frequency from 4.8% to 0.7% of all users.

Math Professor

University of Bridgeport

2011 - 2018 Bridgeport, CT

- Developed a new placement exam with algorithm resulting in a 17% decrease in initial math class dropouts.
- Taught classes in Differential Equations and Multivariable Calculus.

SKILLS

Technical Skills

AI	AWS	C++	CSS	Git	Heroku	Obj-C
HTML5	JavaScript	jQuery	Kotlin	ML	Node	
PostgreSQL	Python	React	Ruby on Rails	Swift		
SwiftUI	SQL	TypeScript				

Personal Skills

Problem Solver	Fast Learner	Embrace Challenges	
Team Player	Creative Spirit	Curious	Leader

EDUCATION

Bachelors in Mathematics

Carnegie Mellon University

2004 - 2008

Masters in Math Education

Columbia University

2009 - 2010

PROJECTS

PaddleScreens

A computer vision ML project providing detailed sports analytics for platform tennis.

- Trained and fine-tuned models for ball tracking, player pose estimation and court segmentation.
- Calibrated high tech industrial cameras to be activated by scanning a qr code on court and capable to record/upload/stream.
- Super easy UI to see match statistics, replays, and close line calls.
- Full stack web and mobile using React, Typescript, Node, Swift and Python.

Tutorius Math

[APP](#) [WEBSITE](#)

A full stack iOS app to provide premium tutoring to underprivileged students. 10000+ downloads in first year (released 8/2023).

- Structured database with CoreData and Firestore, monitoring user statistics and providing personalized feedback on weak areas.
- AI Tutor fine-tuned with test taking skills.
- Invented algorithm in Swift to use LaTeX equations in-line - answered an unanswered stack overflow question: [LINK](#).

RecruitPlan

[LIVE](#)

A full stack website for AI powered insights into all steps of the recruiting process

- Interviewed Coaches, Parents, Athletes, Administrators to develop an all-in-one recruiting information platform
- AI Chatbot gives you next steps, probabilities of admission, and more.
